

## Two In-house Courses Offerings

Quality Control Services, N. L. Squeglia and Associates\*

# Geometric Dimensioning and Tolerancing and Internal Audit Auditing

## GD & T

This is a one day course. Please see the attached course outline.

This course is held at your facility for a maximum of 7 people per course. The standard minimum course fee is based on 4 attendees. There is a standard charge per person over four. There is a separate charge for materials e.g.: books. The cost to the company (or individual-see info below) is based on the amount that we are billed.

If you want someone in your company to attend but have less than four, the standard minimum fee applies.

Also if, for example, if you have just one or two people, let us know and we will try to arrange the course with other people in the same situation from other companies to keep your costs down. We have reasonable fees and use company provided conference rooms to keep our costs down. The host company provides a light lunch.

Unlike a regular public course, you have a say as to when you would like the course held.

## Internal Auditing-Process based

This is also a one day course and the same conditions as above apply. Please see the attached outline.

The standard course is oriented to PROCESS AUDITING and ISO9001:2008.

It can be tailored to AS9100C and ISO 13485 to suit your particular operation.

### The instructor

Nick Squeglia PE. Nick has brought a number of companies to ISO and AS registration, and also does internal auditing for most of them as well as other companies. He also serves as Quality Management Representative for four companies at this time. He is a certified Six Sigma Black Belt and Quality Auditor by ASQ.
