

Quality Assurance Manager Job Description

Posting date: 04/19/2011

Job Description:

Chabaso is a well known, diversified food manufacturer, producing some of the most recognizable Artisan **Bakery** products. The QA **Manager** will provide leadership for the **quality** and food safety systems and programs at this plant. Key drivers are assuring compliance to specification on incoming ingredients, in-process conditions and finished products. They will assure the ongoing reduction of **quality** attribute variation utilizing (SPC) methodology to improve the acceptance of our products by our customers and consumers.

Responsibilities:

Serves as the primary contact for all **Quality**, Food Safety, Kosher, Co-Manufacturing and Regulate Proficient knowledge of **quality assurance** and food safety standards; including third party standards such as AIB and HACCP.

Develops implements and manages the **Quality** and Food Safety System.

Develops, maintains and ensures compliance of a qualified HACCP program.

Ensures the effectiveness of the Master Sanitation and Pest Control programs for the facility and any associated food grade storage areas. The sanitation department would report directly to the QA Manager daily.

Acts as the facility R&D liaison and coordinates with divisional groups on products and test runs.

Drives the incorporation of SPC techniques, process capability and trains others to ensure proper use.

Analyzes QA data to measure, access and improve product **quality** performance.

Communicates compliance results to operating groups, ensures timely feedback and provides technical support to operate processes at target.

Utilizes customer and consumer complaint data to identify root cause, then communicates and provides support to implement process/product improvements.

Determines the disposition of all raw materials, packaging and finished product HOLD orders.

Develops a **Quality** and Product Safety System that consistently meets BFG regulatory, customer, Kosher and third party audit requirements.

Provides support to Divisional **Quality** in a timely manner for sales and customer and consumer requests including documented root cause analysis and recommended corrective actions.

Requirements:

BS or BA degree preferred in Food Science, Business Administration, Engineering or equivalent experience.

Preferred/not required 2-5 years of Food Manufacturing experience.

Quality Assurance Manager
