

Quality Engineer

My client, a successful and growing manufacturer located in the Bridgeport, CT area, needs your skills as a Quality Engineer.

In this position you will coordinate the efforts of a cross-functional team, develop internal audit plans, drive corrective action and provide additional support to the Quality Department among other duties.

They would like to see someone with a minimum 5 years experience in developing, implementing and maintaining documentation in an ISO certified, manufacturing environment. Someone who is a Certified ISO9001 Lead Auditor with a Bachelors Degree in a technical field (i.e. Mechanical, Electrical, Industrial Engineering)

If you would like to hear the complete details please call, fax or e-mail right away :
