

Supplier Quality Engineer - Syracuse, NY

Major Sports Products Manufacturer is seeking a Supplier Quality Engineer to help develop, implement and support a Supplier Quality program for the division.

This position will be responsible for:

- Improving the performance of the vendor supply base for all facilities within the division to insure systems and processes are effective in producing and delivering parts that meet quality, cost and schedule requirements.
- Consolidating efforts of several independent groups that evaluate and track performance and purchase raw materials.

Requirements:

- Extensive Travel required. 80% travel is projected. This position will coordinate the Supplier Quality program for 6 manufacturing facilities. (relocation to the central New York state area is not required, but would be preferred)
- BS degree in Mechanical or Quality Engineering
- 5+ years of supplier and/or quality Engineering experience in a Manufacturing, Machining or Assembly environment.
- Must have a good background in Six Sigma or Continuous Improvement
- Prefer ASQ certification, GD&T knowledge and CMM programming experience
- Must have strong leadership and presentation skills

This company has been around for a long time and has a well recognized and respected name in the industry. E-mail your resume in complete confidentiality.
